

# EZEE Corral™

*Hold your horses...  
the EZEE Corral™ way*

- Portable, electric fence corral
- Sets up in minutes
- D-cell battery operated
- Ideal for:
  - horse shows
  - trail rides
  - hunting trips

# SAFE AND SECURE...

WHEREVER THE TRAIL LEADS YOU.

*When the road takes you  
off the beaten path...*

*Or when you want to blaze  
a trail of your own...*

*...You can still take safety  
and security with you.*

*Bring along the EZEE Corral™  
from Zareba Systems. The  
most convenient portable  
corral system available  
anywhere.*

## **The EZEE Corral™ is:**

- **Complete**—You'll find everything you need in our heavy duty, easy-to-carry canvas bag. Including durable white plastic posts, a built-in battery operated electric fence controller, post anchors, and connecting poly tape reels.
- **Compact**—The components for a 900-square-foot corral fit neatly inside the single canvas bag.
- **Lightweight**—The entire kit weighs less than 22 pounds.
- **Durable**—The EZEE Corral is built to last with rugged components.
- **Fast set up**—Components assemble in minutes allowing you to unload your horse and quickly get them comfortable.
- **Safe**—White, weather resistant components are highly visible for people and animals.
- **Spacious**—30' X 30' temporary corral gives your horses room to roam.
- **Made in the U.S.A.**

# EVERYTHING YOU NEED...

ANYWHERE YOU GO.

## **EZEE Corral™**

*It's all in the easy-to-carry bag.*

**1 No special tools necessary.** Assembling the EZEE Corral is simple. Simply step on post anchor and press it into the ground. Drive plastic stake through the center of the anchor. Then slide each post on an anchor and lock in place. Four corner posts and four line posts included.

**2 No complicated wiring.** Stretch poly tape, which carries electrical current, around the perimeter of the corral. Tape is firmly held in place by built-in insulator clips on line posts. No grounding needed—poly tape carries both positive and negative charge.

**3 Easy connections.** Attach poly tape reels to corner posts. (Adjust height as necessary.) Use plug-in connectors to attach poly tape to poly tape reel, completing the circuit. Reels dispense and store 30 feet of tape, which quickly rewinds for re-use.

**4 Fits any terrain.** Secure corner posts with eight tie-down stakes and six feet of cord, included. Corral design is easily configured to fit available terrain.

**5 High visibility.** Rest easy. Your horses are safe and secure. White components mean high visibility by day, reflective strips command attention at night.

**6 Easy entrance/exit.** Turn system on/off with toggle switch, then come and go as you please. Quick disconnect feature makes it easy to enter or exit the corral from any corner post.

**7 Reliable power source.** Don't worry about running out of power. The EZEE Corral will operate up to 30 days, 24 hours a day, on four alkaline D-cell batteries (not included). Produces up to 8,000 volts and .05 joules per shock. Fencer control box is self-contained in corner post. Features on/off switch and LED light that displays green when in operation or red if batteries are low.

A 900-SQUARE FOOT PORTABLE CORRAL...

IT'S ALL IN THE BAG
