Springtime – Fencing Time

With our previous Newsletter 18/03 you received important information about the economics of our **RED TROUT Energisers** and how you can save money by purchasing the right energiser. Today, we offer you some tips how the damaged fences can be repaired after the wet weather affected most of the country.

- ***Detect Shorts***

An inspection of your fences is made easier with the "**Fence Doctor**", a faultfinder that tells you the status of your fence and points you in the right direction to find possible shorts.

\$ 179.60 incl. GST

- ***Replacing Insulators***

It is obvious that debris or slips have fallen on to the fences have damaged them or dislodged fence posts. If any insulators have been damaged, these must be replaced to ensure that your electric fence is robust.

Red Snap'r offers a **Wood Post Insulator** that is attached to the wood post with only one nail and keeps the electric wire 5 cm off the post. This insulator can also be used on concrete posts.

A Box of 300 insulators \$ 110.40 incl. GST or \$ 0.32 per insulator excl. GST

*Have you ever considered using **Extender Insulators** on your fences that keep the electric wire 13 cm off the post? These have the benefit of preventing stock from rubbing on the posts and damaging them.*

A Box of 125 insulators \$ 110.40 incl. GST or \$ 0.77 per insulator excl. GST

Come and see us in our Showroom, visit our Website or give us a call. We look forward to hearing from you.

Happy Farming!

Your **Red Snap'r** Team
